

Energy Policy

Scope

The energy policy will be applied to all Farnborough Airport operations and will encompass the energy use of staff and company owned properties that are occupied by tenants. It does not seek to encompass equipment or machinery used by tenant companies operating at the Airport or fuels used in connection with their company operations and staff travel.

Policy statement

Farnborough Airport is committed to reinforcing, and where possible accelerating upward trends in energy efficiency across the site. This will be under continual review to ensure on-going improvement as a major driver in maintaining Airport Carbon Accreditation at the Neutrality level.

Long-term objectives

- Commit organisational resources to energy management
- Minimise overall energy use and associated expenditure
- Assign a high priority to energy efficient investments
- Annually review options for procurement of energy from renewable sources
- Monitor and manage site energy usage, through an automatic smart metering system
- Look to achieve annual CO₂ emissions reduction until the maximum practicable efficiency is met

Medium-term targets

- Increase awareness of energy issues amongst company staff through site induction
- Ensure responsibility for energy efficiency is accepted at all departmental levels
- Engage with all site service providers on energy issues
- Establish, publish, achieve, and periodically review performance improvement targets
- Validate ownership of all energy meters on site
- Maintain smart energy metering site wide
- Run an energy monitoring program in conjunction with our Energy Broker
- Operate a Travel Plan to reduce fossil fuel use during travel to and from work
- Purchase the most energy efficient plant equipment that meets operational needs
- Report the annual Carbon Footprint and maintain the Carbon Management Plan
- Maintain level 3+ Airport Carbon Accreditation – Neutrality

Reporting

To measure performance against this policy Farnborough Airport will monitor and review:

- Purchased energy usage (kWh per annum)
- Liquid fuel use (litres per annum)
- Carbon footprint (tCO₂e per annum)

This policy is published internally and externally and will be reviewed regularly to ensure ongoing alignment with the Group's broader business strategy.

CEO, Farnborough Airport
